WELCOME TO A PHOTO STORY OF VERITAS' FINE HOMES.

Each image is intended to tell a story celebrating the deliberate culmination of the Clients, each home's hand-selected design team, and the talented assembly and artisan teams Veritas has developed personalized relationships with over 30 years.

San Juan Lookout: When the southwest Serengeti presents itself, you build a 3-story, 360-degree tower. Inspired by the abundant meadows, landmark peaks, and wildlife and bluebird skylines, this linear hilltop home offers several interior and exterior living spaces to enjoy all nature has to offer. With 11,000 sq. ft.

and eight sliding glass wall systems, the joining of both man-made and natural materials celebrates the site's surroundings while capturing the Owner's dreams. As you enter the home, through the modern curved entry roof and walk through to the focal vista, you realize you've stepped into paradise. Everything from the

foundation, mechanical systems, construction of the home as well as the quality and high-end finishes and furnishing, this home is both striking but also hugs you at the same time. With over 1,500 acres of privacy, this Ranch will undoubtedly be enjoyed for generations to come.

THE BRIDGES: The strongest feature of this design is the passage of natural sunlight through every space in the home. The grand hall with clerestory windows, the glazed connection bridge from the primary garage to the Owner's foyer aligns with the dramatic lighting to allow this home glow both day and night.

This light is influenced and inspired by the evergreen forest on the banks of the Florida River. The goal was to organically show warm tones, texture, and movement. To do this, the surfaces featured are walnut floors, walnut grain matched cabinets, walnut banding and casework along with other wood accents such as live edge countertops, dining table, and benches.

MOUNTAINSIDE MODERN GEM:

The Modern Gem offers a feeling of comfort and, at the same time, embraces entertainment. The components used to create this ambiance include: curved roof lines, floor to ceiling window walls paired with natural and industrial elements.

In addition, indoor/outdoor living spaces were created for this retreat to blend perfectly into the breathtaking natural surroundings. From the exquisite master suite to the fun loving bunk room, each space was designed to be warm and inviting. This home truly is a gem.
